Letter of Commitment to the priorities of the Concordat for the Environmental Sustainability of Research and Innovation Practice

I, Vice-Chancellor Professor Georgina Andrews on behalf of Bath Spa University, confirm our commitment to the priority areas outlined in the Concordat for the Environmental Sustainability of Research and Innovation Practice.

Bath Spa University fully supports the priority areas outlined in the concordat. We will deliver against all the priorities in practice and recognise our responsibilities as a signatory, as set out in the concordat.

By signing this concordat we recognise the need to change how we conduct research and innovation as well as promote wider solutions. We also agree to take shared action now and into the future to reduce and eliminate our own environmental impacts and emissions and achieve the transition to sustainable practices.

Bath Spa University conducts research and promotes innovation across multiple schools and disciplines. By embedding sustainable practices across these activities we will align with the concordat priorities, focusing on key areas of importance and relevance to the university including business travel, procurement, and digital and physical infrastructure. We will focus on implementing a standard of best practice with sustainability as a key tenet for research conducted.

Yours sincerely,

Georgina Andrews

Vice-Chancellor
